Designed specifically by PROSUP for the Video / Film maker, who requires mobility with capacity and strength, the laptop dolly succeeds with this requirement.

The dolly is made from CNC engineered Aluminium together with Stainless steel and incorporates all the following items.

- Platform size 900x700 mm with three Tripod Tie down points.
- Euroboss unit with 9 screw attachment points.
- Pneumatic tyres [Set 4] which can be steered or pulled by the steering "T" Bar handle.
- Push Bar handles which can be used at either end of the dolly.
- Straight Track position lock unit.
- 100mm head bowl 2 units attached for low level tracking.
- Track wheels [Set 4] running on 24.5" 620mm centres.
- The Dolly weighs 15 kg.
- The design allows curve track operation.

## Level Riser

Prosup Level Riser is designed to work with the Lap Top Dolly. It may be used as part of the Swivel Seat or upon its own as a corresponding item to the Euroboss, which is supplied with the Lap Top Dolly.

The Riser is adjusted by slackening the four levers on the riser slides and adjusting to the height required before re-clamping prior to use.

All items are precision made of Stainless Steel and Aircraft Spec. Aluminium. The bowl diameter is 100mm.

## Swivel

The Prosup Swivel has been designed specifically to work with one of the Lap Top Dollies.

The unit is attached to the LapTop's Euroboss M24 holes [supplied with the dolly].

The wheels under the seat pole absorb the weight of the operator whilst allowing easy circular movement around the Level Riser which supports the users pan & tilt head. The seat pole is easily adjusted by means of a lock lever.

A convenient lever locks the rotation of the seat swivel to a static position.
