

## CueScript PTZ Prompter Systems

Until now using a prompter display with a PTZ camera restricted the operation of the PTZ, as these cameras are not designed to work with prompting units.

CueScript has set about to turn this problem on its head... literally!

# CueScript PTZ Prompter Systems

With a patent pending, CueScript has developed a unique mounting system whereby the PTZ camera mounts upside down in the top of a specially designed prompter hood.

Mounting the system in this way removes the operational limitations of a PTZ camera within a prompter; the PTZ has greater movement in the shots it can achieve.

An additional bonus is that using a prompter with a PTZ camera no longer requires high payload taking, expensive tripods, as the CueScript PTZ Mount makes using a lighting stand possible.

- **Unique patent pending mounting system increases the operational movement of a PTZ camera within a prompter.**
- **Available with a choice of 15", 17" or 19" CueScript monitors.**
- **Wall-mount version also available.**

Included in the **CueScript PTZ Prompter System:**

**CueScript PTZ Mount** for tripod and lighting stand (CSMPTZ)

**CueScript PTZ Hood** (CSHPTZ)

**CueScript Monitor** (EMC15, EMC17, CSM15, CSM17 or CSM19)

**PTZ Prompter System part numbers and weights:**

*(PTZ camera not included)*

With the **EMC Monitor** range

**EMCP15PTZ**

15" EMC PTZ Prompter System  
9.6kg / 21.1lbs

**EMCP17PTZ**

17" EMC PTZ Prompter System  
10.2kg / 22.5lbs

With the **CSM Monitor** range

**CSP15PTZ**

15" CSM PTZ Prompter System  
11.1kg / 24.5lbs

**CSP17PTZ**

17" CSM PTZ Prompter System  
12kg / 26.3lbs

**CSP19PTZ**

19" CSM PTZ Prompter System  
12.4kg / 27.3lbs

**CueScript™**
